IGI USER GROUP MEETING

20th – 22nd JUNE 2023 - Hallsannery, Bideford Devon, UK

We will be back to hosting our annual IGI User Group meeting in person in the Devon countryside. This is an opportunity to meet with the IGI team and discuss how we can best support your use of our software.

The meeting will consist of a mixture of demonstrations of using IGI software, introduction to new features and training on these, interactive workshops, and the chance for more informal discussions with IGI software developers and geochemists. Stay at Hallsannery, enjoying on-site luxury accommodation, and talk with colleagues from IGI and other companies.

p:IGI+, Metis and ig.NET

The User Group will give you an opportunity to learn more about the latest features in our software. We will provide training workshops focussing on the latest developments in p:IGI+ in maps, graphs, data quality and workflow support. A focus this year will be on trying to understand how we can simplify workflows, and where we can make p:IGI+ more accessible and user friendly. For partners in the machine learning project there will be an additional day of activity on the 21st-22nd June.

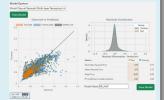

As in previous years, we will be using the User Group to review progress and discuss / prioritise developments for the coming year and we look forward to hearing your views.

Main topics for 2023:

- Demo of new p:IGI+ and Metis features
- o Updates to our IGI property model
- Hands on exercises and training using the new features in p:IGI+ and Metis
- Customising p:IGI+ to better support your company workflows
- Review and discuss prioritisation of future developments

Machine learning

On the afternoon of the 21^{st} and morning of the 22^{nd} we will run focussed sessions for those in the machine learning partnership, training you on the application of

tools in example problems and giving guidance on the appropriate use of the different tools available. We will also be discussing the plans for the machine learning project. It will provide an opportunity to meet and discuss with other partners too.
