

# Senior .NET Backend Developer:

**Location:** Remote. Working from home.

**Salary:** £40k- £60k per year depending on experience and skills, plus bonus and pension

**Job type:** Full-time (with flexibility).

**Tech stack:** .NET 6, C#, SQL Server, Azure SQL, SQLite, WPF, Vue.js

## About us:

Our software team is responsible for developing cutting-edge scientific software to support the visualisation, interpretation and management of geochemical data, through a suite of integrated desktop and web products. We aim to change the way we compile, manage and interpret scientific data across a range of application domains.

We are a team that values people over process, as demonstrated by our flexible, professional approach and friendly atmosphere. Our team is comprised of driven people who combine technical expertise with a collaborative, can-do approach. As a member of our team, we will encourage you to get involved in areas of the company that interest you. We encourage personal and professional development and make space for your training and development needs.

## What we are looking for:

An passionate software developer with experience leading on enterprise level projects on the .Net stack with a focus on quality code. As we are a fully remote software team, you need to be a good communicator, who can work collaboratively and independently when required.

We are looking for someone with the below essential skills and ideally some of the desirable skills.

## Essential Skills:

- Good communication skills.
- Great attitude and team player
- Writing object-oriented code, ideally in C#
- Experience of developing and maintaining backend solutions in .NET

## Desirable skills:

- Working with SQL databases
- Cloud platforms (preferably Azure)
- Web API design, development and deployment
- Writing and maintaining unit and integration tests

## Benefits:

- Small and experienced team working fully remotely.
- Flexible working hours.
- A company bonus scheme.
- 10% of your time devoted to your professional development.

## History:

Established in 1983, IGI has grown to be the world's largest independently owned geochemical consultancy company, providing its expertise to energy industry companies around the world. The company has built an international reputation for innovation in geochemistry, data compilation, scientific visualisation and data management software. We are actively expanding into other application domains to broaden our software's appeal.

Please email your application with covering letter explaining your suitability for this role and CV to Helen Davis ([helendavis@igiltd.com](mailto:helendavis@igiltd.com))
